

## Supplementary Linkage Data

In connection with an ongoing investigation, I acquired the following segregation data from a three point cross: n Z was x N z Was, which corroborate the order and approximated distances of the three loci as indicated on the present linkage map.

Gene combinations			No.	Gene pair	Chi-squares			Recomb. fract.	S.E.	
N	Z	Was			X	Y	Linkage			
+	+	+	155	Was N	1.52	2.56	81.46**	19.0	2.4	
+	+	-	92	Was Z	1.52	0.54	29.17**	15.6	5.2	
+	-	+	27	N Z	2.56	0.54	29.94**	11.4	5.2	
+	-	-	0							
-	+	+	29							
-	+	-	1							
-	-	+	47							
-	-	-	1							
			<u>352</u>							
					(Populations: B285-603-613)					
					N	11	Z	16	Was	
							19
